

DIN 13 164

First-aid handle bag

First-aid roll-up bag

Description of product

First-aid handle bag DIN 13 164

- Contents: Comply with the applicable standard DIN 13 164
- Material: High quality nylon bag with water-repellent PVC coating, strong zip fastener around three sides, transparent internal compartments
- Colours: Red
Bag imprint in black using the screen printing process
- Dimensions: Approx. H 300 x W 230 x D 55 mm
- Weight: Approx. 0.6 kg
- Information: The three sided zip fastener allows the bag to open completely. The contents are then freely accessible to the user and can be easily taken out. The contents are clearly visible in separate transparent compartments, so that even an injured person can select and remove supplies using one hand.
The handle bag has the advantage that it closes up into a very flat shape, which means it is easy to stow away. The handle provides an injured person with a convenient means of carrying the bag.

First-aid roll-up bag DIN 13 164

- Contents: Comply with the applicable standard DIN 13 164
- Material: High quality, strong nylon material, edge trim with hook and loop tape fastening and with hook and loop fastening strips on the back for secure positioning in the car
- Colours: Luminous red with a black imprint
- Dimensions: Approx. L 350 mm and 110 mm diameter
- Weight: Approx. 0.6 kg
- Information: The roll with the carrying loop design of the first-aid bag not only looks good, it is also very practical. The compartments provided in the transparent inner bag sewn to the outer cover of the bag accommodate the specified DIN contents. The contents are open to view and easy to grasp.
This bag not only fulfils the law, which requires first-aid materials complying with DIN 13 164 to be carried in the car, it also makes a comfortable cushion for your head during a break from driving and can be always kept handy on the rear seats.

Ref. No. 25850

Ref. No. 25882

In Germany, the Straßenverkehrs-Zulassungs-Ordnung (StVZO) (the regulations governing the use of vehicles on the road) requires that vehicles carry first-aid materials in compliance with DIN 13 164. Our knowledge and striving to provide the highest quality of protection for the user is reflected in our comprehensive range of first-aid bags, cushions, handle bags and roll-up bags for cars shown below. The latter items are equally suitable for professional drivers or ordinary users who want ease of access to first-aid materials.

All bags or cushions are supplied sealed in film. The use-by date of the sterile products is indicated on a sticker. The first-aid material should always be kept up to date and checked at regular intervals, especially in Germany where providing first-aid is a legal obligation.

First-aid bags for cars DIN 13 164

- Contents: Comply with the applicable standard DIN 13 164
- Material: High quality nylon bag with water-repellent PVC coating, strong zip fastener around three sides
- Colors: Red, black, blue or to suit the customer's wish; bag imprint: in contrasting colour using the screen printing process
- Dimensions: Approx. H 245 x W 135 x D 60 mm
- Weight: Approx. 0.5 kg
- Information: For sufficiently large orders we can supply articles with a logo and inscriptions to suit the customer's wishes. We can also supply custom-made bags to suit the specifications and wishes of the customer.

The DIN-compliant contents are clearly arranged in a fold-away bag with 6 sections and can be taken out easily.

First-aid cushions for cars DIN 13 164

- Contents: Comply with the applicable standard DIN 13 164
- Material: Outside casing made from textile-backed, dirt-repellent PU or PVC, or from cotton in various designs, or from velour, all with zip fastener openings and foam inserts
- Colors: Grey, blue, red, multicoloured, black; cushion imprint in contrasting colour
- Dimensions: Approx. H 330 x W 270 x D 60 mm
- Weight: Approx. 0.5 kg
- Information: For sufficiently large orders we can supply PVC/PU cushions with logos and inscriptions to suit the customer's wishes.

The cushion casing holds the DIN 13 164-compliant contents. The first-aid materials, clearly arranged and protected from dust in twin-sectioned pouches, can be easily taken out.
