HANS HEPP
Dressings and
first-aid material

Individual products

Description of product

HANS HEPP GmbH & Co. KG has been manufacturing and selling first-aid materials since its foundation in the year 1938. Our first-aid materials are manufactured in Hamburg in accordance with European guidelines for medical products and diverse DIN standards. Our knowledge and striving to provide the highest quality of protection to the user is reflected in our comprehensive ranges of products.

- Motor vehicles (DIN 13164 und DIN 13167)
- Household and sport

- Office and factory (DIN 13157-C und DIN 13169-E)
- **Individual products**

First-aid materials to DIN requirements

All products that are used in the contents of our comprehensive ranges of articles can be obtained as refill/replacement packs or as individual products. In addition, we can put together special kits to suit the customer's wishes (e.g. first-aid training bags, advertising articles, etc.).

HEPPPLAST plasters and self-adhesive bandages

To augment our first-aid materials, we stock a wide range of eudermic, hypoallergenic, waterproof and elastic plasters and self-adhesive bandages made from polyamide non-woven fabric.

- Ranges of plaster strips in various widths and lengths (20 or 50 in a pack)
- Plaster strips to the customer's requirements (e.g. packed in a dustproof pouch)
- 10 No. self-adhesive bandages 100 x 60 mm or 100 x 80 mm
- 5 m self-adhesive bandages made from eudermic, hypoallergenic, waterproof and elastic polyamide non-woven fabric, in a dispenser in widths of 40/60/80 mm.

Ref. No. 93800

HEPP plaster dispenser (Ref. No. 93800)

The Hepp plaster dispenser allows plasters to be produced in individual lengths to suit the injury. The backing material is cut to length by pressing on the dispenser lid. At the same time the plaster is applied to the wound - resulting in the "production" of a suitable plaster for normal injuries or for finger tip wounds. The plaster dispenser is attached to the wall to allow one-handed operation.
